FXG DUPLEX MUD PUMP for Mud, Grout and Cement Service

Model	Stroke		Size neter	Displa	cement	Max Pump RPM	Jack- shaft RPM	Input HP at Max. Speed	*** Maximum Working Pressure		Maximum Piston Load
		in.	mm	gpm	lpm				psi	kg/cm2	
FXG(*)	6" (152 mm)	5 4 ½ 4 3 ½ 3	127.0 114.3 101.6 88.9 76.2	150 121 95 72 52	568 458 359 272 197	75	354	32	310 385 492 646 895	21 27 34 45 62	6,122 lbs. (2,777 kg)

Based on 90% mechanical efficiency and 100% volumetric efficiency.

Specifications subject to change without notice.

^{**} These speeds are recommended for favorable suction conditions and consideration must be given to viscosity and character of fluids.

^{***} Maximum working pressure shown applies to the fluid ends. Power ends are designed for certain maximum piston rod loads, and in service the power end determines the maximum pressure on a given size piston. Tabulated maximum pressure for any given size piston for maximum piston rod load must not be exceeded even at reduced RPM. Fluid cylinder liners and pistons are interchangeable in all sizes except for the FXF cylinders fitted with 4 ½" parts and FXX and FXD cylinders with 5 ½" parts.
